

Carlo Incerti

Dr. Incerti serves as Chief Medical Officer of Genzyme Corporation, where he oversees Global Medical Affairs , which includes Medical Operations, Global Regulatory Affairs and Compliance, Global Patient Safety and Risk Management, Evidence Value Development/Health Economics and Outcomes Research and Global Policy.

Dr. Incerti is a Board Certified Endocrinologist, who started his career in the medical profession as a staff member and then as Associate Professor at the Department of Endocrinology of Modena University Hospital in Italy. He joined Genzyme in 1992 as Medical Director Europe and then was promoted to Senior Vice President Biomedical and Regulatory Affairs Europe. In his tenure he was responsible for the development of all of the Genzyme products in the rare disease field, with specific focus on Lysosomal Storage Disorders. He is currently member of the Board of EBE (European Biotechnology Enterprises), member of the Board of EFPIA (European Federation of Pharmaceutical Industries and Associations) and Vice Chairman of the Governing Board of IMI (Innovative Medicine Initiative), a Joint Undertaking between the EU Commission and EFPIA, which oversees the management of EU research funds for a total of 7 Billion Euro.

Dr. Incerti is a founding member and part of the IRDiRC (International Rare Disease Research Consortium), an international group which aims to foster the research and development of therapeutics for rare diseases.
